Cancer Letters, 68 (1993) 251 – 254
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 68

Aberrant crypts, cholic acid, colon carcinogenesis, 15
Acid soluble sulphydryl level, sandalwood oil, glutathione *S*-transferase, mouse liver, 105
Alcohol dehydrogenase, glutathione-*S*-transferase, aldehyde reductase, diethyl-nitrosamine, liver carcinogenesis, 177
Aldehyde reductase, glutathione-*S*-transferase, alcohol dehydrogenase, diethyl-nitrosamine, liver carcinogenesis, 177
Androgen, larynx cancer, cathepsin D, oestrogen, glucocorticoid, progesterone, 135
Antisense construct, p120, MCF-7, 95
Antitumor promoter, Epstein-Barr virus, phloroglucinol derivatives, inhibitor, tumor promotion, 1
Antitumor promotion, dihydroagarofuran sesquiterpene, Epstein-Barr virus activation, 12-*O*-tetradecanoylphorbol-13-acetate, 129
Arachidonic acid, gastric cancer cell line, phospholipids, proliferation, triglycerides, 199
Asbestos, mesothelioma, plasminogen activator, plasminogen activator inhibitor, 119
Ascitic tumour, plasma membrane, Walker 256, carcinoma cells, solid tumour, 91
Astrocyte precursors, glioblastoma, glioma, glial cell lineages, 215
Autocrine, transforming growth factor-β, colon carcinoma, differentiation, growth inhibition, 33
Azo dye, detoxication and activation of carcinogens, peroxidase, DNA- and tRNA-binding, 43
Azoxymethane, restriction, hepatocarcinogenesis, rat, GST-P positive foci, 67

B cells, c-*fos*, lipopolysaccharide, transgenic mice, 243
Benzo[*a*]pyrene, DNA binding, mutagenesis, *Oldenlandia diffusa*, *Scutellaria barbata*, cytochrome *P*-450, 75
Bladder cancer, glutathione S-transferase, larynx cancer, tobacco smoke, risk markers, 49

Carcinogenesis, fucoxanthin, carotenoid, 159
Carcinogenesis, trout, (±)-7,8-dihydrobenzo[*a*]pyrene-7,8-diol, cooxidation, enantiomer, 225
Carcinoma cells, plasma membrane, Walker 256, ascitic tumour, solid tumour, 91
Carotenoid, fucoxanthin, carcinogenesis, 159
Cathepsin D, larynx cancer, androgen, oestrogen, glucocorticoid, progesterone, 135
C-*fos*, B cells, lipopolysaccharide, transgenic mice, 243
Chemical mismatch cleavage, p53, ovarian cancer, mutation, 83
Cholic acid, aberrant crypts, colon carcinogenesis, 15
Chronic atrophic gastritis, O^6-alkyltransferase, gastric mucosa, gastric cancer, 169
Colon carcinogenesis, aberrant crypts, cholic acid, 15
Colon carcinoma, transforming growth factor-β, autocrine, differentiation, growth inhibition, 33
Cooxidation, trout, (±)-7,8-dihydrobenzo[*a*]pyrene-7,8-diol, carcinogenesis, enantiomer, 225
Cytochrome *P*-450, benzo[*a*]pyrene, DNA binding, mutagenesis, *Oldenlandia diffusa*, *Scutellaria barbata*, 75
Cytotoxicity, human macrophages, tumor necrosis factor-α, epithelial ovarian cancer, 25

Detoxication and activation of carcinogens, azo dye, peroxidase, DNA- and tRNA-binding, 43
Diethyl-nitrosamine, glutathione-*S*-transferase, alcohol dehydrogenase, aldehyde reductase, liver carcinogenesis, 177
Diethylstilbestrol, liver carcinogenicity, liver DNA adducts, rats, 193
Differentiation, phospholipase C-γ, F9 teratocarcinoma, 237
Differentiation, retinoblastoma, pigmented epithelium, serotonin, dopa, 207
Differentiation, transforming growth factor-β, autocrine, colon carcinoma, growth inhibition, 33
Dihydroagarofuran sesquiterpene, Epstein-Barr virus activation, antitumor promotion, 12-*O*-tetradecanoylphorbol-13-acetate, 129
(±)-7,8-Dihydrobenzo[*a*]pyrene-7,8-diol, trout, carcinogenesis, cooxidation, enantiomer, 225
Dimethylsulfoxide, *neu*, signal transduction, 55
DNA binding, benzo[*a*]pyrene, mutagenesis, *Oldenlandia diffusa*, *Scutellaria barbata*, cytochrome *P*-450, 75
DNA synthesis, tea, polyphenol, (-)-epigallocatechin gallate, hepatoma, erythroleukemia, 231
DNA- and tRNA-binding, azo dye, detoxication and activation of carcinogens, peroxidase, 43

Dopa, retinoblastoma, pigmented epithelium, serotonin, differentiation, 207
Duroquinone, hydroquinone, enzyme altered foci, γ-glutamyltranspeptidase positive hepatocytes, glutathione *S*-transferase, 149

Enantiomer, trout, (±)-7,8-dihydrobenzo[*a*]pyrene-7,8-diol, carcinogenesis, cooxidation, 225
Enzyme altered foci, hydroquinone, duroquinone, γ-glutamyltranspeptidase positive hepatocytes, glutathione *S*-transferase, 149
(-)-Epigallocatechin gallate, tea, polyphenol, DNA synthesis, hepatoma, erythroleukemia, 231
Epithelial ovarian cancer, human macrophages, cytotoxicity, tumor necrosis factor-α, 25
Epstein-Barr virus activation, dihydroagarofuran sesquiterpene, antitumor promotion, 12-*O*-tetradecanoylphorbol-13-acetate, 129
Epstein-Barr virus, phloroglucinol derivatives, inhibitor, tumor promotion, antitumor promoter, 1
Erythroleukemia, tea, polyphenol, (-)-epigallocatechin gallate, DNA synthesis, hepatoma, 231
Ethanol, nitrosamines, *N*-nitrosodiethylamine, *N*-nitrosopyrrolidine, N^6-(methylnitroso)-adenosine, lung tumors, stomach tumors, thymic lymphomas, 61
Experimental metastasis, experimental myelomonocytic leukemia, experimental myelomonocytoma, leukemia transplantation, 185
Experimental myelomonocytic leukemia, experimental myelomonocytoma, experimental metastasis, leukemia transplantation, 185
Experimental myelomonocytoma, experimental myelomonocytic leukemia, experimental metastasis, leukemia transplantation, 185

F9 teratocarcinoma, phospholipase C-γ, differentiation, 237
Fucoxanthin, carotenoid, carcinogenesis, 159

Gastric cancer cell line, arachidonic acid, phospholipids, proliferation, triglycerides, 199
Gastric cancer, O^6-alkyltransferase, gastric mucosa, chronic atrophic gastritis, 169
Gastric mucosa, O^6-alkyltransferase, chronic atrophic gastritis, gastric cancer, 169
Glial cell lineages, glioblastoma, glioma, astrocyte precursors, 215
Glioblastoma, glioma, astrocyte precursors, glial cell lineages, 215
Glioma, glioblastoma, astrocyte precursors, glial cell lineages, 215
Glucocorticoid, larynx cancer, cathepsin D, androgen, oestrogen, progesterone, 135
γ-Glutamyltranspeptidase positive hepatocytes, hydroquinone, duroquinone, enzyme altered foci, glutathione *S*-transferase, 149
Glutathione S-transferase, bladder cancer, larynx cancer, tobacco smoke, risk markers, 49
Glutathione-*S*-transferase, alcohol dehydrogenase, aldehyde reductase, diethyl-nitrosamine, liver carcinogenesis, 177
Glutathione *S*-transferase, hydroquinone, duroquinone, enzyme altered foci, γ-glutamyltranspeptidase positive hepatocytes, 149
Glutathione *S*-transferase, sandalwood oil, acid soluble sulphydryl level, mouse liver, 105
Growth inhibition, transforming growth factor-β, autocrine, colon carcinoma, differentiation, 33
GST-P positive foci, restriction, hepatocarcinogenesis, rat, azoxymethane, 67

H-9, multidrug resistance, *P*-glycoprotein, protein kinase inhibitor, staurosporine, K252a, 7
Hepatocarcinogenesis, inhibitory effect, piroxicam, indomethacin, rat, 111
Hepatocarcinogenesis, restriction, rat, azoxymethane, GST-P positive foci, 67
Hepatoma, tea, polyphenol, (-)-epigallocatechin gallate, DNA synthesis, erythroleukemia, 231
Human macrophages, cytotoxicity, tumor necrosis factor-α, epithelial ovarian cancer, 25
Hydroquinone, duroquinone, enzyme altered foci, γ-glutamyltranspeptidase positive hepatocytes, glutathione *S*-transferase, 149

Indomethacin, inhibitory effect, piroxicam, hepatocarcinogenesis, rat, 111
Inhibitor, Epstein-Barr virus, phloroglucinol derivatives, tumor promotion, antitumor promoter, 1
Inhibitory effect, piroxicam, indomethacin, hepatocarcinogenesis, rat, 111

K252a, multidrug resistance, *P*-glycoprotein, protein kinase inhibitor, staurosporine, H-9, 7

Larynx cancer, cathepsin D, androgen, oestrogen, glucocorticoid, progesterone, 135
Larynx cancer, glutathione S-transferase, bladder cancer, tobacco smoke, risk markers, 49
Leukemia transplantation, experimental myelomonocytic leukemia, experimental myelomonocytoma, experimental metastasis, 185
Lipopolysaccharide, B cells, c-*fos*, transgenic mice, 243
Liver carcinogenesis, glutathione-*S*-transferase, alcohol dehydrogenase, aldehyde reductase, diethyl-nitrosamine, 177

Liver carcinogenicity, diethylstilbestrol, liver DNA adducts, rats, 193
Liver DNA adducts, diethylstilbestrol, liver carcinogenicity, rats, 193
Lung tumors, nitrosamines, *N*-nitrosodiethylamine, *N*-nitrosopyrrolidine, N^6-(methylnitroso)-adenosine, ethanol, stomach tumors, thymic lymphomas, 61

MCF-7, p120, antisense construct, 95
Mesothelioma, asbestos, plasminogen activator, plasminogen activator inhibitor, 119
Mouse liver, sandalwood oil, glutathione *S*-transferase, acid soluble sulphydryl level, 105
Multidrug resistance, *P*-glycoprotein, protein kinase inhibitor, staurosporine, H-9, K252a, 7
Mutagenesis, benzo[*a*]pyrene, DNA binding, *Oldenlandia diffusa*, *Scutellaria barbata*, cytochrome *P*-450, 75
Mutation, p53, ovarian cancer, chemical mismatch cleavage, 83

N-nitrosodiethylamine, nitrosamines, *N*-nitrosopyrrolidine, N^6-(methylnitroso)-adenosine, ethanol, lung tumors, stomach tumors, thymic lymphomas, 61
N-nitrosopyrrolidine, nitrosamines, *N*-nitrosodiethylamine, N^6-(methylnitroso)-adenosine, ethanol, lung tumors, stomach tumors, thymic lymphomas, 61
N^6-(methylnitroso)-adenosine, nitrosamines, *N*-nitrosodiethylamine, *N*-nitrosopyrrolidine, ethanol, lung tumors, stomach tumors, thymic lymphomas, 61
Neu, dimethylsulfoxide, signal transduction, 55
Nitrosamines, *N*-nitrosodiethylamine, *N*-nitrosopyrrolidine, N^6-(methylnitroso)-adenosine, ethanol, lung tumors, stomach tumors, thymic lymphomas, 61

O^6-alkyltransferase, gastric mucosa, chronic atrophic gastritis, gastric cancer, 169
Oestrogen, larynx cancer, cathepsin D, androgen, glucocorticoid, progesterone, 135
Oldenlandia diffusa, benzo[*a*]pyrene, DNA binding, mutagenesis, *Scutellaria barbata*, cytochrome *P*-450, 75
Ovarian cancer, p53, chemical mismatch cleavage, mutation, 83

P-glycoprotein, multidrug resistance, protein kinase inhibitor, staurosporine, H-9, K252a, 7
P120, antisense construct, MCF-7, 95
P53, ovarian cancer, chemical mismatch cleavage, mutation, 83
Peroxidase, azo dye, detoxication and activation of carcinogens, DNA- and tRNA-binding, 43
Phloroglucinol derivatives, Epstein-Barr virus, inhibitor, tumor promotion, antitumor promoter, 1
Phospholipase C-γ, differentiation, F9 teratocarcinoma, 237
Phospholipids, arachidonic acid, gastric cancer cell line, proliferation, triglycerides, 199
Pigmented epithelium, retinoblastoma, serotonin, dopa, differentiation, 207
Piroxicam, inhibitory effect, indomethacin, hepatocarcinogenesis, rat, 111
Plasma membrane, Walker 256, carcinoma cells, ascitic tumour, solid tumour, 91
Plasminogen activator inhibitor, asbestos, mesothelioma, plasminogen activator, 119
Plasminogen activator, asbestos, mesothelioma, plasminogen activator inhibitor, 119
Polyphenol, tea, (-)-epigallocatechin gallate, DNA synthesis, hepatoma, erythroleukemia, 231
Progesterone, larynx cancer, cathepsin D, androgen, oestrogen, glucocorticoid, 135
Proliferation, arachidonic acid, gastric cancer cell line, phospholipids, triglycerides, 199
Protein kinase C, tumor-promoting phorbol ester binding, signal transduction, 143
Protein kinase inhibitor, multidrug resistance, *P*-glycoprotein, staurosporine, H-9, K252a, 7

Rat, inhibitory effect, piroxicam, indomethacin, hepatocarcinogenesis, 111
Rat, restriction, hepatocarcinogenesis, azoxymethane, GST-P positive foci, 67
Rats, diethylstilbestrol, liver carcinogenicity, liver DNA adducts, 193
Restriction, hepatocarcinogenesis, rat, azoxymethane, GST-P positive foci, 67
Retinoblastoma, pigmented epithelium, serotonin, dopa, differentiation, 207
Risk markers, glutathione S-transferase, bladder cancer, larynx cancer, tobacco smoke, 49

Sandalwood oil, glutathione *S*-transferase, acid soluble sulphydryl level, mouse liver, 105
Scutellaria barbata, benzo[*a*]pyrene, DNA binding, mutagenesis, *Oldenlandia diffusa*, cytochrome *P*-450, 75
Serotonin, retinoblastoma, pigmented epithelium, dopa, differentiation, 207
Signal transduction, *neu*, dimethylsulfoxide, 55
Signal transduction, tumor-promoting phorbol ester binding, protein kinase C, 143
Solid tumour, plasma membrane, Walker 256, carcinoma cells, ascitic tumour, 91

Staurosporine, multidrug resistance, *P*-glycoprotein, protein kinase inhibitor, H-9, K252a, 7
Stomach tumors, nitrosamines, *N*-nitrosodiethylamine, *N*-nitrosopyrrolidine, N^6-(methylnitroso)-adenosine, ethanol, lung tumors, thymic lymphomas, 61

Tea, polyphenol, (-)-epigallocatechin gallate, DNA synthesis, hepatoma, erythroleukemia, 231
12-*O*-tetradecanoylphorbol-13-acetate, dihydroagarofuran sesquiterpene, Epstein-Barr virus activation, antitumor promotion, 129
Thymic lymphomas, nitrosamines, *N*-nitrosodiethylamine, *N*-nitrosopyrrolidine, N^6-(methylnitroso)-adenosine, ethanol, lung tumors, stomach tumors, 61
Tobacco smoke, glutathione S-transferase, bladder cancer, larynx cancer, risk markers, 49
Transforming growth factor-β, autocrine, colon carcinoma, differentiation, growth inhibition, 33
Transgenic mice, B cells, c-*fos*, lipopolysaccharide, 243
Triglycerides, arachidonic acid, gastric cancer cell line, phospholipids, proliferation, 199
Trout, (±)-7,8-dihydrobenzo[*a*]pyrene-7,8-diol, carcinogenesis, cooxidation, enantiomer, 225
Tumor necrosis factor-α, human macrophages, cytotoxicity, epithelial ovarian cancer, 25
Tumor promotion, Epstein-Barr virus, phloroglucinol derivatives, inhibitor, antitumor promoter, 1
Tumor-promoting phorbol ester binding, protein kinase C, signal transduction, 143

Walker 256, plasma membrane, carcinoma cells, ascitic tumour, solid tumour, 91

Cancer Letters, 68 (1993) 255–256
